## Comcare

*“Conference acknowledges the ongoing work undertaken by divisions to improve the OH&S Acts in each State. Conference calls on the Federal and State Governments to improve their OH&S Acts. Issues that need to be addressed include Industrial Manslaughter, Increased Penalties, improved rights for union OH&S worker representatives (particularly, protection from victimisation), explicit unrestricted Right of Entry for Union officials and Union Initiated Prosecutions.*

*The current Comcare Review recently announced by Federal Minister Gillard and various current State OH&S reviews gives us the opportunity to campaign on these issues.”*
